Education

Vellore Institute of Technology

Integrated M.Tech in Computer Science and Engineering

Vellore, India

2021 – 2026

Experience

AhaApps Infotech Pvt Ltd

Software Trainee (Intern)

Hyderabad, India

Oct 2025 – Present

- Automating insurance document validation and data extraction workflows to reduce manual human processing.
- Using Microsoft Power Automate and AI Builder to orchestrate document extraction workflows and integrate extracted data into backend systems.
- Built backend pipelines to extract structured data from PDF documents and store validated fields in relational databases.
- Implemented rule-based validation logic to detect missing, inconsistent, and incorrect values using business rules.
- Developed dynamic reporting modules in .NET (C#) for operational tracking and validation summaries.
- Working on a Natural Language to SQL system using offline LLMs to enable non-technical querying of databases.

Virtusa

Core Java Developer Intern

Remote

Aug 2025 – Sep 2025

- Developed backend services for a logistics management system using Spring Boot and REST APIs.
- Implemented role-based authentication and inventory management workflows.
- Integrated backend services with frontend components using React.js and MySQL.

Projects

• Insurance Document Automation Platform

Designed a backend system to extract, validate, and store key data from insurance PDF documents. Automated manual verification workflows using conditional rules, orchestration flows, and database-driven validation.

Tech: .NET (C#), SQL Server/MySQL, Microsoft Power Automate, AI Builder, PDF Parsing, Python

• Natural Language to SQL using Offline LLMs

Built a backend service allowing users to query relational databases using plain English. Implemented schema-aware prompting and query validation before execution.

Tech: Python, LangChain, Local LLMs, SQL

• Backend Inventory & Delivery Management System

Developed a backend-driven inventory and delivery tracking system with role-based access for internal teams and delivery agents. Designed REST APIs for inventory updates, delivery status tracking, and reporting workflows.

Tech: Spring Boot, REST APIs, MySQL, Spring Security

Technical Skills

Programming: Python, Java, C#, SQL

Backend: Spring Boot, REST APIs, .NET

Databases: MySQL, SQL Server, MongoDB

Cloud: AWS (EC2, S3), Azure (App Services, Storage)

Automation Platforms: Microsoft Power Automate, AI Builder

DevOps (Learning): Docker, CI/CD basics, GitHub Actions

Frontend (Working Knowledge): React.js, HTML, CSS

LLMs & NLP: LangChain, Prompt Engineering, Offline LLMs

Tools: Git, GitHub

Certifications

Microsoft Certified: Azure AI Fundamentals (AI-900)
